SAFEBUILD ALLIANCE

ZERO INCIDENTS THROUGH COLLABORATION

SafeBuild Alliance, through a generous grant from OSHA, is pleased to announce a new partnership with LatinoBuilt to enhance construction safety for our local Spanish-speaking workforce.

By engaging with industry leaders and the local contractor community, our collective goals through this initiative are to:

1. Empower and support construction companies and labor organizations in expanding Spanish-language safety training
2. Develop and distribute safety training materials in Spanish
3. Provide training and education for Latino construction owners

Accomplishing these goals will result in reduced injuries, and increased knowledge and awareness for Latino workers across Oregon and SW Washington.

SafeBuild Alliance & LatinoBuilt – working together to make a positive, immediate impact on the health and well-being of our Spanish-speaking workforce!

Best Regards,

Travis Baker
President
SafeBuild Alliance
