

Constructing the Future

Join us online on Wednesday, January 20 from 1pm to 2:30 p.m.

Learn about construction careers that build a brighter climate future!

Big Jobs for a Big World

Join us to learn more about constructing the buildings of the future through careers in architecture, construction, HVAC systems, solar panels, energy efficiency and weatherization. Meet four local business professionals who can help you get started in a great career in these fields. See the next page to learn more about our speakers!

Meet the Speakers for Constructing the Future

Construction and Design Career Track

Berenice Lopez-Dorsey, President,
H.E.L.P. - Home Energy, Life, Performance Group, Inc.

Berenice has 21 years of experience in the construction of residential Latino homes and is COBID certified (minority and woman owned businesses). She is a member of LatinoBuilt and she is part of various organizations that dedicate their time to helping the community.

Sustainable Design Architect Career Track

Ozzie Gonzalez, Owner, P3 Consulting

Ozzie is an urban ecologist and relentless change-maker. He has dedicated his career to designing and building solutions that bridge environmental health with community prosperity. Ozzie is the Owner of P3 Consulting—a solo consulting practice dedicated to helping small and large businesses grow while improving their environmental and social impacts.

Solar Power Career Track

Betzabel Osornio-Serna, Solar Design Coordinator,
Elemental Energy

Betzabel is an energy engineer with three years of experience in photovoltaic design. She started working at Tesla in Mexico and now works at Elemental Energy in Portland, designing solar panel installations.

Energy Efficiency & Home Performance Career Track

Jose Benitez, Home Performance Manager/Sales,
Performance Insulation + Energy Services, Inc.

Jose works for an HVAC and insulation company. He has been working in insulation for 24 years. He began by installing these systems and then rose to become a supervisor and is now the manager.
